We are DC TUNING

- Remapping Specialists.
- Tuning and Diagnostic Tool supplier.
- Technical Support Specialists.

ECU Tuning / Remapping

What do we do and how do we do it.

By careful recalibration of the engine management system we are able to unlock the true potential of most petrol and diesel engines fitted to modern passenger vehicles.

During the remapping process, a wide range of parameters are adjusted such as injection quantity, turbo boost pressure, torque limiters, and many more.

This results in increased performance and efficiency without compromising the reliability of the vehicle.

- MORE POWER
- INCREASED ENGINE TORQUE
- BETTER THROTTLE RESPONSE
- OVERALL IMPROVEMENT OF DRIVEABILITY.

We offer a wide range of additional software options dependant on the vehicle application including -

- DPF SOLUTIONS
- EGR SOLUTIONS
- ADBLUE SOLUTIONS
- SWIRL FLAP SOLUTIONS
- MAF SOLUTIONS
- LAMBDA SOLUTIONS
- RPM LIMITER SOLUTIONS
- LAUNCH CONTROL SOLUTIONS
- DSG SOLUTIONS

Agent Network

We have an extensive nationwide network of DC Tuning agents sharing the same quality values in the level of product and service offered to their customers making DC Tuning a powerhouse in the tuning world.

We have been using Diagnostic Connections for some time now, and have always found them to be a friendly and useful team. So when Chris came to me and said they were going to start supplying maps/software upgrades we sat down with him and listened.

As we are a business that looks after high end Land Rover vehicles we are very careful what we download etc to customer vehicles, but I can say we have never been let down with the files sent to us.

The guys have also been able to supply a rectification file after another garage had downloaded an incorrect file and caused the vehicle to fail a MOT.

The Guys also have a network of specialists, like ourselves, who if someone has a problem Chris will contact us to try and help others, this is above and beyond and is really appreciated when your back is against the wall.

Keep up the good work guys.

David Hodgetts

'I joined a couple of years ago having already carried out hundreds of remaps and I've found the support from DC Tuning second to none! The file turnaround is incredibly fast, queries and questions responded to quickly, and my customers are always pleased with their vehicle transformation! On one occasion the team even offered to send me their equipment to support the process. I know I can rely on the quality and reliability of the team at DC Tuning - highly recommended.'

Rich - RM Automotive Diagnostics

I have used various file providers in the past.
Due to being let down in the past I switched to DC 18 months ago.
Never looked back excellent service they make you feel valued.
Kyle is a superstar.

Andrew Stead

I have been dealing with Chris and the team at DC Tuning for many years and I have always found them very helpful. The products they sell are of outstanding quality and the aftersales support they provide is brilliant.
I would highly recommend this company.

Woodlinkin Citroen Centre.

We are a garage in the West Midlands and known Chris for many years, have to say these guys are some of the best in the business, the equipment I have purchased has been excellent all top quality.

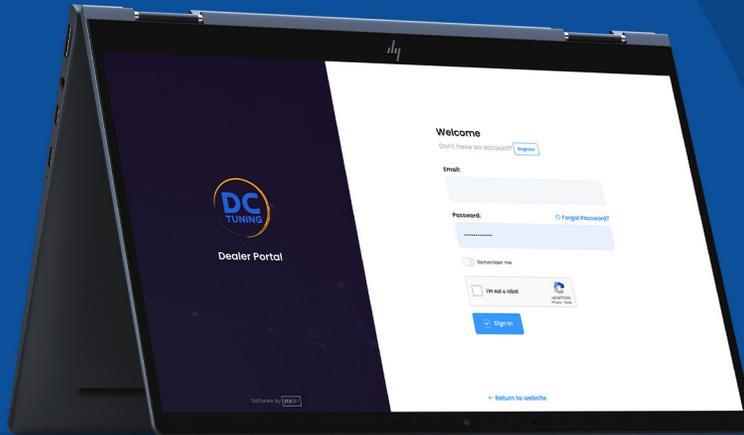

But the best part is the back up you receive, our vehicle remapping is made so much easier when using this team, the help you receive is second to none.

Rob Betts

Fantastic customer service and after sales support 100% recommend.

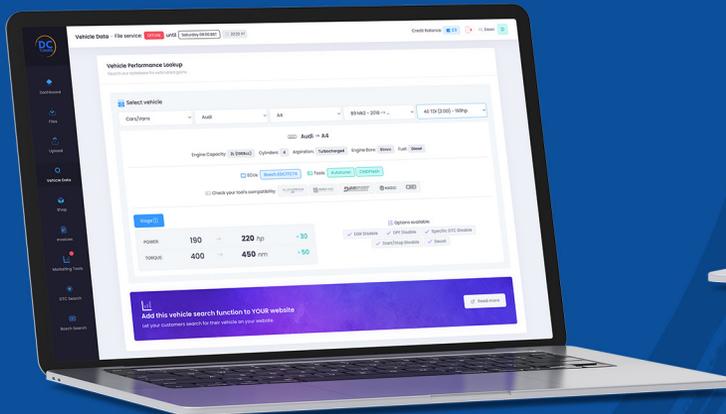

Matt Freeman

DC Tuning Portal

Our state-of-the-art tuning portal ensures quick and secure transfer of tuning files between our tuning file experts and our extensive network of DC Tuning agents.

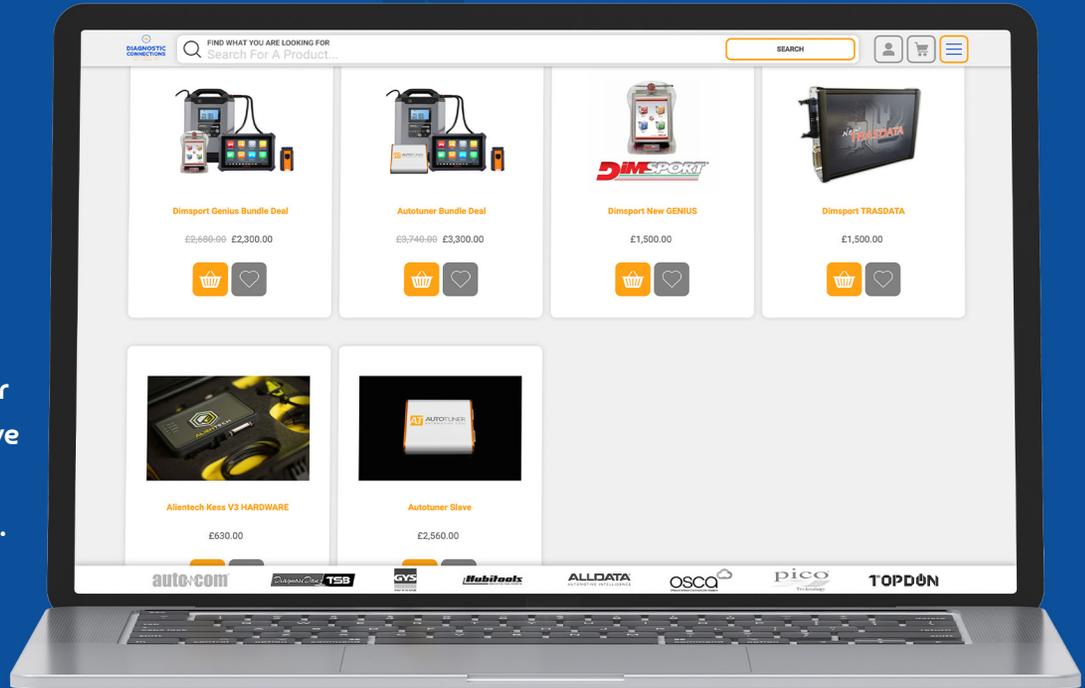

✓ Quick and easy vehicle performance lookup.

✓ Bosch search function.

Tuning and Diagnostic Equipment

Our experts will advise on the relevant equipment to suit your requirements ensuring you have the correct tools available to complete each job successfully.
